

GE ADAPT

Pre-Rinse Spray Valve Stainless Steel Adaptor Installation Instructions

Description

The stainless steel adaptor is designed to allow the fitting of the GE 37421 Water Efficient Trigger Spray Valve to a variety of pre-rinse spray hose brands, including T&S Brass, Encore, CH models and a number of unbranded imported models.

Installation

1. Using a shifter or spanner unscrew the existing spray valve from the pre-rinse spray hose.
2. Generally in the end of the pre-rinse hose is a washer used to seal the connection, if required replace the washer with the one provided in the Adaptor Kit. Check to ensure there is no other foreign debris blocking the hose.
3. Check to ensure there is no foreign debris blocking the hose.
4. Wrap a generous amount of white sealing tape on the male thread end of the adaptor.
5. Screw the stainless steel adaptor into the end of the pre-rinse hose and tighten firmly with a shifter or spanner.
6. Install the Pre-Rinse Heavy Duty Hand Trigger Spray Valve as per the instructions provided.
