

# CRH Butyl Rubber Aluminium Foil Tape, 50mm x 15m

PART No: KJ-656-50

## FEATURES

### CRH Butyl Rubber Mylar+ Aluminium Foil Tape, 50mm x 15m

- Available with easy-peel backing paper

#### Materials:

Mylar-Polyethylene Terephthalate (PET) coated Aluminium foil-coated tape, 1.1 thick. Butyl rubber adhesive will adhere to most surfaces including:

- Metals
- PVC
- Brick
- Fibreglass
- Glass
- Timber

#### Usages:

Butyl tape is very versatile and has many application uses:

- Provides an air tight and water tight seal
- Will not dry out
- Maintains its stickiness at lower temperatures

#### Application:

- All surfaces are to be clean and dry and free from dust, grease, oil, loose mortar and any other foreign material before applying CRH Butyl aluminium foil tape.
- Cut tape carefully with a knife or scissors.
- Remove the backing paper and apply tape onto the surface, press firmly along its whole length to achieve good adhesion and mould in place.
- Overlap adjoining strips by a minimum of 25mm.

CRH Australia Pty Ltd 1-3 Nelson Street Moorabbin VIC 3189 Australia t+61 3 9532 2696
