2 x Zip-Clip KL200 4m x 4.8mm GY Seismic Bracing Kits

PART No: IEEE4GY

FEATURES

2 x Zip-Clip KL200 4m x 4.8mm GY Seismic Bracing Kits

Zip-Clip Seismic Bracing Systems offer a simple and engineered solution to brace and secure non-structural building services, improving the resilience and safety of buildings in the event of an earthquake.

The design and installation of Zip-Clip Seismic cable bracing for building services not only achieves the life-safety requirements of building codes and seismic design standards but also makes significant improvements to the functional recovery of buildings following an earthquake, by minimising seismic movement and associated damage.

Seismic bracing installations must be designed and approved by a qualified structural engineer to ensure that it meets the applicable building requirements. For an engineered bracing solution for your next project, please click contact us.
