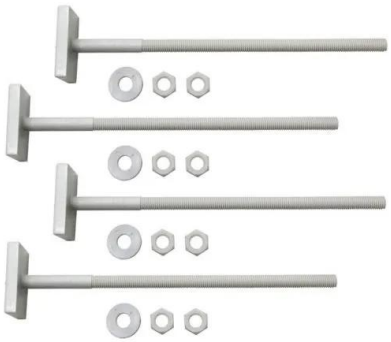
CRH Evaporator Mounting Kit

PART No: CRH-EMK

FEATURES

The CRH Evaporator Mounting Kit consists of 4 x 235mm x M10 Nylon Bolts, 4 x Washers & 8 x M10 Nuts. While these items can be used for a number of purposes this configuration is particularly good for the mounting of Evaporators in Cool Rooms & Freezer Rooms due to the following features:

- Low thermal conductivity from outside the room to inside & visa versa.
- Strength - The products are constructed from Nylon 6.6 which is one of the hardest engineering plastics available.
- A safe vertical working load of 80kg per Bolt, Washer & Nuts combination.
- Flammability - Self extinguishing.
- 2 x Nylon Nuts are supplied purposefully so the second nut on each Bolt locks the first nut in place and helps prevent loosening through vibration.



Colour: White

Material: Nylon 6.6
