Ezy-Wash Stainless Steel Heavy Duty Pre-Rinse Hose 1015 x 15FI BSP

PART No: 37416

FEATURES

GE Heavy Duty Pre-Rinse Hose - 1015mm

15FI BSP - Swivel Ends

ADDITIONAL INFORMATION

- Stainless steel crimps.
- Long life brass dual swivel.
- 15mm BSP female threads, to adapt to most common pre rinse spray guns.
- This hose must be installed/sealed using Loctite 577, which is a tread sealant approved for use with potable water(AS/NZS 4020). If hose is to be removed for maintainance purposes, ensure to reseal the joints with Loctite 577, or an equivalent sealant compliant with AS/NZS 4020. Do not use thread tape to seal the hose connections, as this may cause the hose nut to become loosened over time and leak.
