Fermod Sliding Door Automation Kit

PART No: F5010SVPH

FEATURES

Electronic automation kit for Fermod sliding door kits.

ADDITIONAL INFORMATION

Features and advantages:

- Reduced installation time. The optimized design of the 5010 kit provides very simple mechanical mounting and electrical wiring.
- Suitable for left hand or right hand opening doors.
- Vertical buffer and horizontal photo cell ensure the door and operators safety.
- This automatic kit is controlled by an electronic board and programmable micro processor integrating numerous features to fulfil everyday requirements.
- All settings (starting, driving force) are made with simple programming on a keypad with LCD screen.
- Smooth and silent operation
- Identical equipment and parts suitable for all door openings and sizes (horizontal or 90° motor mounting)

3 operation types available:

- Standard: opening and closing by command order
- Timer 1: opening by command order, automatic closure after timer has lapsed
- Press and hold opening/closing mode: opening and closing by press and hold command

Power Requirements:

- Power supply 220 V single-phase

Pelmet:

- Note the Kit does not include a Pelmet, but it does include pelmet end covers allowing the installer to fold a pelmet to shape.
