ADDITIONAL INFORMATION

There are mandatory safety requirements to protect personnel against entrapment in Refrigerated or Cooling Chambers, Strongrooms or Vaults. Refer to the Technical Information to view the Australian Building Code & Australian/New Zealand Standards. CRH & All manufacturers highly recommend that all internal safety release mechanisms fitted to doors are checked at least 3 times weekly to ensure they are functioning correctly. It is highly recommended that low temperature food grade grease is applied in situations where icing may occur (K1094400325)
