# Kason Food Grade Silicone, Aluminium Grey

PART No: KASONSIL

## FEATURES

**Kason Food Service Silicone, Aluminium Grey, 300ml**

- Premium grade, fully certified silicone adhesive sealant outperforms cheap hardware store brands
- Waterproof adhesive bonds better than generic sealants; won't peel, reduces service call-backs for leaks
- Air-cures overnight; tack-free in 15 min
- ULTRA LOW VOC - 30g/L
- Standard and high temperature formulas, sealant won't sag during application. Apply vertically, horizontally or overhead.
- One-piece,300ml. rigid plastic cylinder fits all standard caulking guns.

Standard formula is serviceable from -62° to 204° C.

Kason Rubba Seal Food Service Silicone Adhesive Sealant is  a premium grade food safe silicone which air cures overnight.

Kason Food Grade Silicone is a 100% silicone product which is approved by the NSF (National Science Foundation). This agency independently tests, audits & certifies consumer products for the Food & water sectors.

One reason this product meets the approval standards of NSF is because it has little or no extenders added to the silicone. Extenders are additives that many manufacturers use to assist with hardness, tear strength, elongation & cure speed.

If extenders are added to the base silicone compound they increase the Volatile Organic Compound (VOC) which can potentially release toxic vapors and gasses.

**Colour:** Aluminium Grey

**Material:** 100% Silicone
