Nordon PRP00102 Pressure Relief Valve

PART No: PRP00102

FEATURES

The Nordon pressure Relief Vent adapts to a wall thickness from 65mm to 150mm thick and is secured without the use of screws or rivets. • No mechanical parts to breakdown. • A vermin filter is standard. • An electrical junction box. • Antifreeze Heater 8 watt.

Colour: White

Material: Plastic

ADDITIONAL INFORMATION

Pressure changes in Walk-in Refrigerated Rooms & Freezers cause the wall panels to move in and out resulting in a breakdown of the seals in the panel junctions, thus permitting ice to form in the wall and cause damage Multiple Ports are used in larger rooms. Safety Aspect: In a properly constructed freezer room failure to install a pressure relief port/vent could delay the door from opening thereby trapping workers inside
