PVC Clear Freezer Strip, 2mm x 200mm x 50m

PART No: SDROLL-2x200F

FEATURES

PVC Clear Freezer Strip, 2mm x 200mm x 50m

We offer a diverse selection of transparent PVC strip curtain material for cold rooms & freezers, available in 50m bulk rolls. The smooth-surfaced option is easily cleanable and provides excellent clarity. On the other hand, the ribbed variety is more resilient, making it suitable for motorised or machine traffic. These ribbed strips exhibit enhanced durability against impacts and wear and resist sticking together in environments with moisture and condensation. In bustling work settings, where the movement of items in and out of cold rooms is frequent, the non-sticking feature of the curtain strips contributes to a safer workplace.

For those looking to construct their own PVC strip door, it is essential to assess specific work requirements and doorway dimensions to determine the quantity of 50m rolls and hanging hardware components needed for your door curtain door. The flexibility or stiffness of the final strip curtain depends on the strips' thickness and the degree of overlap in the design.

Please Note: **Negative Temperature Strip Rolls must not be installed in positive temperature environments as this will result in the material sweating & becoming sticky.**

Colour: Clear

Material: PVC

ADDITIONAL INFORMATION

Cut your own PVC strips to size.

Failure to use graded strip in freezer applications will cause standard grades to split prematurely.
