Kason Entrapment & Open Door Alarm

PART No: K1967-A57

FEATURES

Kason Entrapment & Open Door Alarm

K1967-A57 Kason 12 Volt Entrapment & Open-Door Alarm with Battery back-up.

Housed in weatherproof & dustproof external mounting boxes the Kason Entrapment & Door Open Alarm has an LED display that indicates that it is online in Power or Battery mode and releases sharp red and blue flashing LED lights along with a 105dB piezo siren when activated in Panic mode or releases flashing yellow LED lights & piezo siren when the Door Open Alarm is activated.

The Door Open Alarm may be set to ‘immediate’ or has two-time delay options available, 10 minutes or 20 minutes delay.

New Features include:

- Upgraded siren with 105dB output at 3m
- Permanently illuminated inside emergency push button so it is clearly seen in the dark.
- New design features, an emergency yellow & black colour coded arm module
- Door open alarm with a magnetic sensor & mounting bracket now included. (It is optional to activate this feature)
- Suitable for Cool Rooms & Freezers to -40 degrees
- Colour-coded LED sequence for each alarm type
- Alarm operating & safety labels included.
- Option to connect to a monitored dialler system.

Please Note:

The siren has been measured at 105dB at 3m in the manufacturer's laboratory, room acoustics & size may affect dB results.

Installation is effortless with a basic 'plug & play' connection and the 12v system simply plugs into a 240v power point.
